PROFESSIONAL SUMMARY

Software Engineer with experience working on scalable back-end systems as well as full-stack development with emphasis on efficiency, security, and reliability. Expertise in API development, database optimization, and cloud deployments. Knowledgeable in technologies such as React.js and Node.js with a sound understanding of distributed systems/system design concepts. Experienced in building production-grade software with focus on clean architecture and efficient data/service management.

SKILLS

- **Languages:** Python, Java, JavaScript, SQL , HTML/CSS
- **Backend & APIs:** Backend: Flask, Node.js, Spring Boot
- **Model Deployment:** Docker, Model Deployment, CI/CD Pipelines
- **Cloud & OS:** AWS (Basics) / GCP (Basics), Linux
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Tools:** Git, Docker, Postman, Power BI, Tableau, VS Code

INTERNSHIP EXPERIENCE

Full Stack Web Development Intern | CODTECH IT SOLUTIONS PVT LTD | Hyderabad, Telangana Dec 2025 – Apr 2026

- Built responsive web applications using **HTML, CSS, JavaScript, React.js, and Node.js** – implemented features like user authentication, database integration, and RESTful APIs under mentorship.
- Completed assigned projects with **exceptional performance**, showcasing deep understanding of full-stack development, creative problem-solving, and commitment to code quality.
- Collaborated with the development team, participated in code reviews, and delivered all tasks within deadlines, earning recognition for dedication and technical proficiency.

PROJECTS EXPERIENCE

Intelligent Full-Stack Web Security Analyzer Using AI

Technologies: React.js, Flask, TensorFlow, Scikit-learn, Celery, Docker, Kubernetes, PostgreSQL, OWASP

- Developed a full-stack AI-based web security scanner using React.js and Flask with real-time vulnerability detection using WebSockets.
- Built machine learning models using TensorFlow and Scikit-learn to detect SQL Injection, XSS attacks, and malicious URL patterns.
- Implemented Celery-based asynchronous processing to handle large-scale scanning tasks efficiently.
- Containerized the application using Docker and deployed it on Kubernetes for scalable production deployment.
- Followed OWASP security guidelines to ensure secure API design and reduce common web vulnerabilities.

EDUCATION

- **Bachelor of Technology (B.Tech)** – Artificial Intelligence & Machine Learning
Andhra Loyola Institute of Engineering and Technology, JNTUK

Year: 2022 – 2026

CERTIFICATIONS

- Full-Stack Web Development -Udemy.
- Python Essentials – Cisco Artificial Intelligence – SkillDzire
